

# Sire Portfolio

APRIL 2022

# Welcome

## Jetstream Genetics is pleased to share our April 2022 Sire Portfolio.

We're celebrating 2022 with our 10th anniversary as Jetstream Genetics. Serving our customers with exciting sires year after year, for a decade, has been a dream come true. We're looking forward to many more years supporting your genetic dreams and goals.

YOLO's proven daughter performance bolstered by second-crop success is timely with our 10th anniversary. He illustrates how we've expanded our sire availability with modern sires that help enable our customers' success. YOLO exemplifies the reliable and consistent daughter pattern backed by high fertility that all dairies strive for.

Agriculture and the dairy industry must continue to modernize infrastructure, processes, as well as genetic selection, to meet the evolving needs of our world and be sustainable suppliers of this food chain. We believe in the power of genetics and genetic technology to help dairy producers meet these needs through incremental gains in margin and efficiencies.

In North America, 80% of all AI services are with genomic-tested sires, providing the tools for ever-faster genetic gain. On these pages, you will find our strong and diverse sire lineup, including time-tested Performance Proven Sires, Robotic Engineered Sires, Jetset Genomic Sires, Reprojct Fertility Sires and our Custom Cut Type Sires. Along with this top-caliber lineup, our sexed semen offering continues to grow to meet customer needs.

We are proud to support progressive genetic improvement as a valued member of the URUS group. The companies within the URUS family provide dairy and beef producers around the world with cutting-edge products, genetics and herd management support and information. We have never been in a stronger position to serve our clients and we are confident for the opportunities these genetics provide our customers.

*Sincerely,*
