

SIRE PORTFOLIO

APRIL 2025

Welcome

Jetstream Genetics is pleased to share our April 2025 Sire Portfolio.

We are proud to support progressive genetic improvement as a valued member of the URUS group. The companies within the URUS family provide dairy and beef producers around the world with cutting-edge products, genetics and herd management support and information. We have never been in a stronger position to serve our clients, and we are confident for the opportunities these genetics provide YOU, our valued customer.

Proven Performance Sires like BLASKA embody the quality we strive to deliver. Daughters of MAINSTAGE and JAGGER daughters have excelled in herds across the U.S. and Australia, with JAGGER daughters earning top awards in milking classes at International Dairy Week January 2025 in Australia. Additionally, sires like YOLO, DELAP, HAXL and KONRAD deliver top performance and consistent breeder satisfaction.

In this resource, you'll find a diverse selection of elite sires, including Proven Performance Sires, Robotic Engineered Sires, Jetset Genomic Sires, Reprojet Fertility Sires, and Custom Cut Type Sires. We're also expanding our sexed semen offerings.

As the dairy industry strives to support a sustainable food supply, our genetics help producers increase efficiency and protect margins. We are committed to helping agriculture and dairy advance through modernized infrastructure, processes and genetics.

We continue to partner with many outstanding breeders in North America to deliver their results to you with our sire offering. "Better cows for a Better World"

Sincerely,

Jetstream Genetics
